Home Delicate

A new beginning and a new story about passion for good kitchens, good design and the necessity to experience special moments, Home Delicate Restaurant wants to be a real home for its clients. The different areas – starting from the entrance, the inner garden and the living room – are mingled so that the barriers between private and public disappear and the atmosphere becomes relaxing and cosy.

The design, the materials, the pieces of furniture and the kitchen create a domestic environment. Home Delicate Restaurant is in the centre of the new Fashion District of Tortona and aims to be a landmark in the area. This is why the pieces of furniture will often change without compromising its character: neat but comfortable, up-to-the-minute but comfy.

The design team ensured the optimisation of the project for functionality and economy. Dedicated to research, they continually look for new techniques of construction, new materials, innovative technologies and always predicting design philosophies.

Riccardo Salvi
Luca Rossire
Photography:
Logica: architettura
Client:
Home Delicate Restaurant

Highlight: Home Delicate Restaurant is a new beginning and a new story about passion for good kitchens, good design and the necessity to experience special moments.

The long entrance corridor takes the clients out of the metropolitan chaos and leads them to a hidden garden which represents a pause in the middle or at the end of the day.
